Mission & Vision

Connecting People to the Ocean
Improve the knowledge of Portuguese coastal ecosystems' functioning through the development of an environmental monitoring system

Core Activities

- Satellite data services
- Near real-time water quality data from estuaries
- Portuguese Animal Tracking Network
- Environmental and biological historical data and time series
- Private and public consultancy
- Training and capacitation

Contacts

José Lino Costa: Email: jlcosta@fc.ul.pt

Facebook: @CoastNetRI

Contribution to the All-Atlantic Ocean Research and Innovation Alliance

Relevant thematic area

Relevant resources for collaborative research and innovation

- Environmental and Biological Monitoring System
- Portuguese Animal Tracking Network
- Web-based CoastNet Platform
- Coastal Remote Sensing System
- Assessment and Management of Biological Invasions
- Underwater Passive Acoustic Monitoring
