RESEARCH UNIT DESCRIPTION

CCMAR-Algarve develops multidisciplinary research, advanced training, research services and scientific advice centered on three essential pillars:

- 1) **Knowledge** of fundamental ocean processes and the development of novel technologies derived from this knowledge
- 2) **Ocean Health**, dedicated to tackling global challenges aligned with regional and national strategies for climate change, the Green Deal5, and the UN Sustainable Development Goals
- 3) **Ocean Wealth** dedicated to promoting of the Blue Economy through aquaculture, marine biotechnology, and marine resource management, including fisheries

Contribution to the All-Atlantic Ocean Research and Innovation Alliance

Relevant thematic area

Relevant resources in the promotion of Atlantic collaborative R&I

- Research services - access to marine resources, services, and facilities to develop R&D in marine sciences.
- Collaboration - international research projects and consortia in the fields of marine sciences, biomedicine, biotechnology, and ocean literacy.
- Capacitation - advanced training courses, MSc and PhDs.
